

GeNetix Node 2 (GN2)

Product Code: CS300062

Genetix Node 2 is a two-port Ethernet-DMX node that is compatible with any console supporting Art-Net and sACN. GeNetix Node 2 can also be used as a USB interface for MagicQ PC systems, unlocking MagicQ from demo mode when connected via its USB-C port.

Configuration is simple, whether done locally via its in-built display, remotely with its onboard webserver or from the console. Powered by either PoE or its USB-C port, this versatile device is at home in many different environments as a standalone interface, truss-mounted in the rig via its M12 receiver or installed via its DIN rail mount.

GeNetix Node 2 supports Art-Net, sACN, RDM and supports both DMX input or output from its two DMX ports.

Features

- 2 RDM DMX Ports supporting Input and Output
- Supports Art-Net & sACN.
- Webserver for remote configuration
- In-built display and encoder for local configuration.
- Unlocks MagicQ PC Systems into 'Reduced mode' via either USB or Network
- Can be USB or PoE powered

Specifications

Hardware Specification

- RDM Direct DMX Ports: 2
- Network Ports: 1
- PoE Input: Yes
- USB Ports: 1 USB-C

Software Specifications

- Art-Net/sACN Support
- ChamNet Support
- Configurable DMX Timings
- Web Server
- User Presets
- DMX Redundancy Support

Weights and Dimensions

- USB A-C Cable
- Din Rail Mount Clip

Weights and Dimensions

- Width: 125mm (4.92")
- Depth: 133mm (5.23")
- Height: 44mm (1.73")
- Weight: 0.85 KG (1.87 lbs)
