

# VL2600 SERIES

---

## SUBJECT

---

New software release

### OVERVIEW

Updated firmware for the following fixtures

Fixture	Version
VL2600 PROFILE	VL2600P_060822
VL2600 SPOT	VL2600S_060822
VL2600 WASH	VL2600W_060822

The latest software can be download from the product page or our website [www.VARI-LITE.com](http://www.VARI-LITE.com)

### RELEASE NOTES:

Resolves issues with fixture responding to DMX whilst performing it start up calibration or ReCal Calibration. Fixture now ignores all incoming DMX signals until the calibration process is complete.

### New Feature added:

Default Frequency Lock:

default LED frequency from the factory is 1200 Hz. For the instances where you do not wish for the "Reset Defaults" to reset the LED frequency to this frequency, we have added a Frequency Lock. To change this setting, go through the "Service" menu, enter the password, and select the "Default Freq Lock".

UI Activation Instructions

- Service -> [PASSWORD] -> Default Freq Lock
  - Freq Lock Off <normal operation>
  - Freq Lock On <keeps the LED frequency setting during the "Reset Defaults" command>

Locked frequency only effects the rest to defat command frequency adjustment and changes still possible when active.

### Know software issues:

None
